IDENTIFIERS	*Kentucky

ABSTRACT

This report provides data on public and private high school graduates and dropouts in Kentucky. The introduction contains tables and graphs comparing the career directions (attending college or trade school, military, working, at home, unemployed, deceased, homemakers, and unknown) of Kentucky graduates in 1968 and 1983 and enrollment patterns between 1979 and 1983. Part I presents tables indicating the holding power and whereabouts of graduates of 1983 public and non-public high schools by school district. Part II presents summary data on holding power trends and the career directions of graduates for the period 1974-1983 for students of Kentucky public high schools, Kentucky non-public high schools and for all students combined. Data were compiled from the School Data Form and the superintendent's year-end report. (IS)

Holding Power and Graduates

Kentucky Public and Non-Public High Schools May 1983 Classes

Office of Research and Planning
Kentucky Department of Education
Alice McDonald, Superintendent

Spring, 1984

--printed with state funds--

A Message from the Superintendent

A quality educational program requires the understanding and support of a knowledgeable populace. It is for this reason that the Office of the Superintendent annually publishes reports dealing with generally accepted indicators of quality.

One such indicator of quality is the completion rates for public and non-public schools, published in the yearly report, Holding Power and Graduates. In the current Holding Power and Graduates, May 1983, the completion rates for public and non-public schools are arrayed on a district by district basis.

Although this report is statistical in nature, the data presented herein, along with other data, provides a picture of the most recent graduating class and compares it to the class that graduated in 1968.

With past court decisions affecting the relationship between non-public schools and the Department, the data base for non-public is incomplete because non-public schools can, at their option, choose not to report. Therefore, enrollments and graduation data for the non-public schools is incomplete.

This report notes a .8 percent increase over last year in the percentage of ninth graders who graduated from high school. It is a pleasure to report that after two years of decline, in 1979 and 1980, the following three years have had increases of 1.1 percent, .9 percent, and .8 percent.

During the next four years the leadership will strive to improve the programs so that the graduation rates will continue to increase.

Alice McDonald

Alice McDonald
Superintendent of Public Instruction

Foreward

Holding Power and Graduates has been published annually for the past 28 years. This document provides historical data, which, when compared to the most recent graduating class, helps educators and the general public to understand how student needs have changed and how the school districts have adapted to meet those student's needs. The Minimum Foundation Program has made a significant contribution to Kentucky's schools and will continue to do so in the future.

The improvement in percentage of ninth graders completing high school is evidenced in the comparative analysis of the class of 1983 as compared to the class of 1968. This fifteen-year timeframe indicates the overall trend of students to be oriented toward staying in school and going into post-secondary education programs. A large increase is also noted in the percentage and number of graduates entering military services from 1968 to 1983.

Holding power, simply defined, is the percent of students graduating from high school based on the ninth grade population four years earlier. It is a numerical reporting system that assumes a stable student population with no in or out migration. If a specific high school had 100 ninth grade students in 1979 and four years later, in 1983, 75 students graduated, the holding power would be 75 percent. It does not mean that the dropout rate was 25 percent for that high school.

This report is published with the understanding that schools are subject to ever-changing dynamics; however, this report provides data for the most recent year. The data are useful to individuals responsible for educational policy and practice.

Rebecca Brown

Rebecca Brown, Associate Superintendent
Office of Research and Planning

Acknowledgements

A great deal of credit for this report of The Holding Power and Graduates goes to the high school principals of Kentucky and those divisions in the Department of Education responsible for collecting and reporting pupil data. Special recognition is due the Office of Computer Services for the continued development of a data retrieval system.

Special acknowledgement is also extended to the Division of Pupil Personnel Attendance and Accounting. Yearly reports from this division make possible the consolidation and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Introduction

This twenty-eighth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools has the purpose of providing an overview of growth during the 1968-83 period, in addition to presenting data for the current graduating class of 1983. The 1967-68 school year marked the beginning of the eighth year of a new era in public education in Kentucky with a record-breaking appropriation made possible by revenue from the enactment of a sales tax. While there are many dimensions of a comprehensive state-local-federal financing plan for providing full educational opportunity, it is generally agreed that the ultimate criterion of adequacy of any plan is the quality and quantity of educational outcomes made possible through its operation. The class of 1983 is the twelfth graduating class having full advantage of a twelve-year program under the Minimum Foundation Program.

Using the eighth year of the decade of the Sixties as baseline data, and the graduate output for the current year (1983), the following comparisons point to selected measures in the 15-year period of growth and expansion of the high school program in Kentucky.

As reported in Table 1, the increase in the number of all high school graduates for the class of 1983 (44,963) as compared to the class of 1968 (40,921) is 4,042 or 9.9 percent.

While this increase in graduates was taking place, the actual number of births for the corresponding year 1965 (class of 1983) compared to the births in 1950 (class of 1968) decreased from 73,852 in 1950 to 61,392 in 1965 or a decrease of 20.3 percent.[1]

A comparison of whereabouts of graduates of all Kentucky high schools, 1968 and 1983, reveals the following changes in a 15-year span in the standard categories for which principals provide data. These changes are shown in Table 1 on the following page.

---

[1]As supplied by the Cabinet for Human Resources.

TABLE 1

COMPARISON OF THE WHEREABOUTS
OF KENTUCKY GRADUATES: 1968-1983

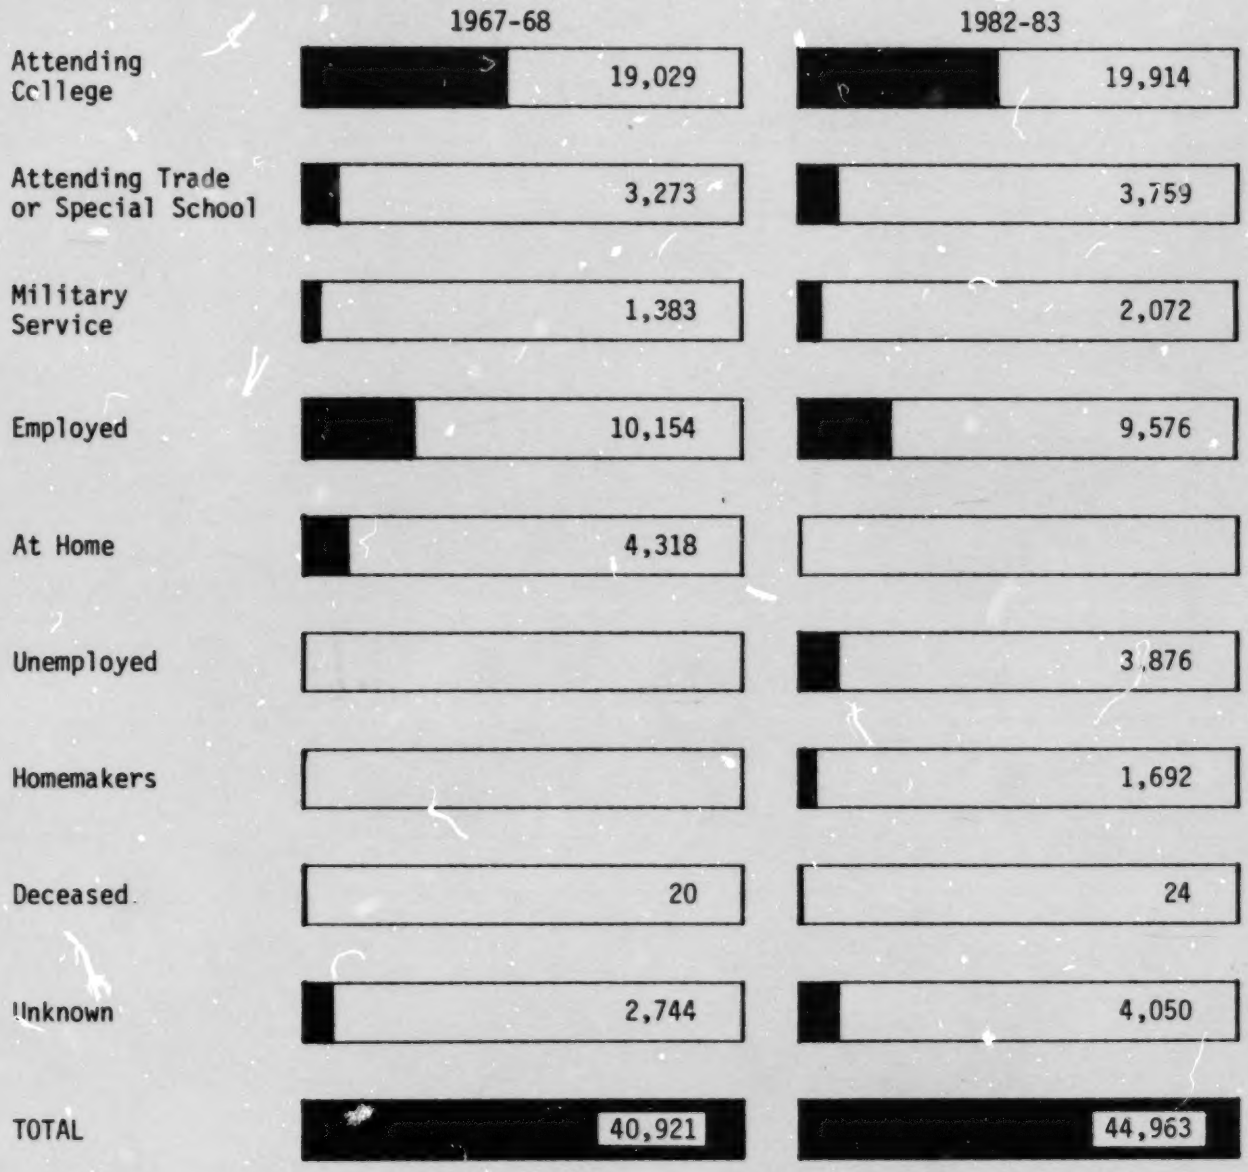
(Public and Non-public)

Standard Categories	1968	1983	Change	% Change
College or unviersity	19,029	19,914	+885	+ 4.7
Trade or special school	3,273	3,759	+486	+14.8
Military	1,383	2,072	+689	+49.8
Working	10,154	9,576	-578	- 5.7
At home	4,318	-	-	-
Unemployed	-	3,876	-	-
Deceased	20	24	+4	+20.0
Homemakers	-	1,692	-	-
Unknown	2,744	4,050	+1,306	+47.6
Total	40,921	44,963	+4,042	+9.9

In the fall of 1968, 22,302 or 54.5 percent of June graduates were reported entering a formal program of education beyond the high school level. Fifteen years later, principals reported 23,673 or 52.6 percent of the 1983 graduates enrolled in a post-secondary program -- college or university, trade, technical, nursing school or business school. A graphic comparison is shown in Figure 1.

FIGURE 1

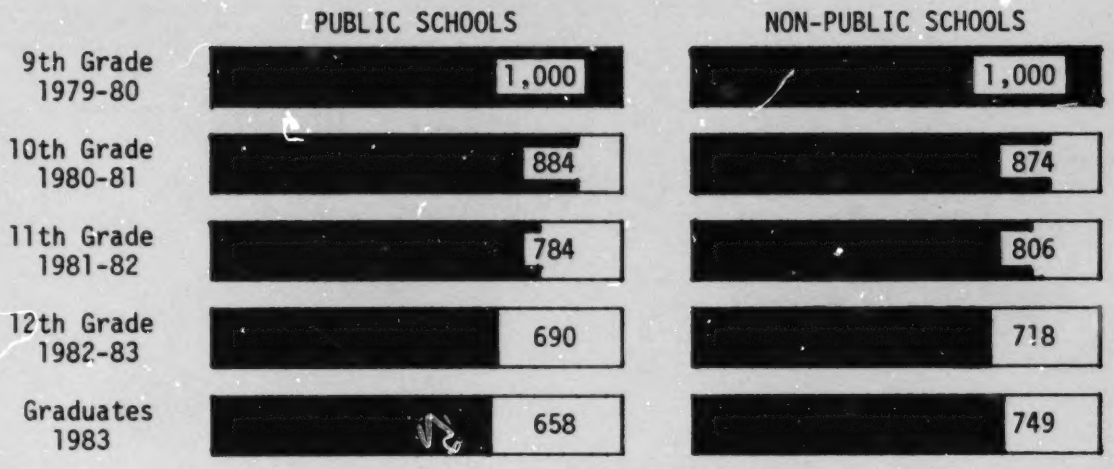
A GRAPHIC COMPARISON OF THE
WHEREABOUTS OF KENTUCKY GRADUATES: 1968-83
(Public and Non-Public)



As shown in Figure 1, the pattern of the whereabouts of Kentucky's graduates has remained relatively stable over the past 15-year period in most categories. The number and percentage of graduates attending a trade or special school has increased by 486 or 14.8 percent. The unknown category increased by 1,306 or 47.6 percent. At the same time the number of graduates going to work decreased by 578 or a loss of 5.7 percent.

FIGURE 2

ENROLLMENT PER ONE THOUSAND NINTH GRADERS



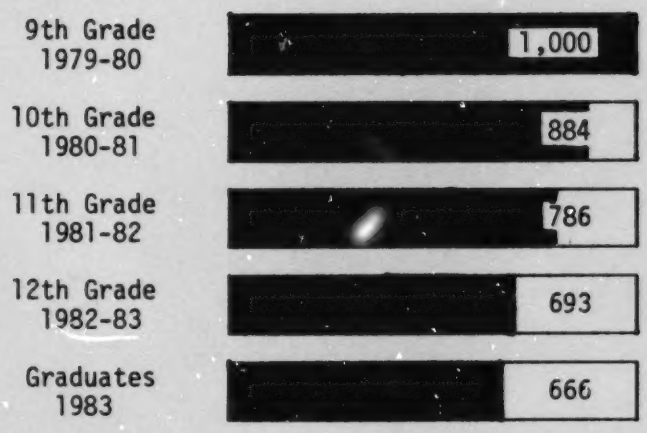


Figure 2 portrays the enrollment pattern over the past four years. Over the past 10 years, the pattern portrayed in the above figure has remained fairly constant.

TABLE 2

THE WHEREABOUTS OF 1983 GRADUATES

	PUBLIC SCHOOLS	NON-PUBLIC SCHOOLS	ALL SCHOOLS
Attending College in Kentucky	15,286	2,241	17,527
Attending College Outside of Kentucky	1,767	620	2,387
Attending Trade or Special School	3,522	237	3,759
Military Service	1,987	85	2,072
Employed	9,220	356	9,576
Unemployed	3,776	100	3,876
Homemaker	1,670	22	1,692
Deceased	22	2	24
Unknown	3,589	461	4,050
TOTAL	40,839	4,124	44,963

As indicated in Table 2, there were 44,963 students graduating from all Kentucky high schools, of which 22,620 (50.3 percent) were boys and 22,343 (49.7 percent) were girls. There were 19,914 students recorded as entering college or 44.3 percent of the total 1983 graduating class. There were 23,673 (52.6 percent) of 44,963 graduates recorded as entering into some formal educational program beyond the high school level including special and trade schools.

Source and Interpretation of Data

There are two primary sources of data on public high school graduates; the School Data Form and the superintendent's end-of-year report. Statistical data on number of graduates on the School Data Form in the fall may vary from end-of-year data in the Statistical Report of the superintendent, submitted at the close of the school year on June 30. The School Data Form, completed in the fall, collects graduates from the previous year and the subsequent summer. The Statistical Report completed in June collects graduates from the year just completed and the prior summer. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only, whereas this report accounts for all reported graduates of public and non-public high schools in the state. Non-public schools who did not report are not included.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollment in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade. State data are collected annually on the School Data Form.

REPORTING THE DATA

Tables 1 and 2 on the preceding pages portray the rapid growth of secondary education in the late sixties, seventies, and early eighties. The Highlights section provides a brief summary of tabular data.

Part I presents current data on holding power and graduates of public and non-public school districts in Tables 3 and 4. Trends and related data are shown in Part II.

Highlights

PUBLIC SCHOOLS

There were 40,839 students, composing 90.8 percent of the total, graduating from Kentucky's public high schools in the spring of 1983. Public high school refers to all high schools under the direct control of any one of the 180 local school districts across the Commonwealth. Of the public high school graduates, 20,283 (49.7 percent) were girls, while the remaining 20,556 (50.3 percent) were boys. There were 17,053 (41.8 percent) recorded as entering college. There were 20,575 (50.4 percent) of these graduates recorded as entering into some type of formal educational program beyond the high school level including special and trade schools.

NON-PUBLIC SCHOOLS

There were 4,124 students, or 9.2 percent of the state total, graduating from Kentucky's non-public high schools in the spring of 1983. This includes all high schools not under the direct control of one of the 180 local school districts; state or federally controlled, parochial or private. Of the non-public high school graduates, there were 2,051 (49.7 percent) girls and 2,073 (50.3 percent) boys. There were 2,861 (69.4 percent) students recorded as entering college. There were 3,098 (75.1 percent) recorded as entering some formal program of education, including special and trade schools. This data represents only non-public schools who elected to report. All schools in this category are not necessarily included.

Part I
Holding Power and Graduates

Tables 3 and 4 included in this section provide a comprehensive overview of the number and whereabouts of graduates of all Kentucky public and non-public school districts, for the school year 1982-83. There were 67,541 ninth grade public and non-public high school students enrolled in Kentucky schools in 1979-80. Of these ninth graders, 44,263 or 66.6 percent were graduates in 1983.

As previously discussed, the data concerning the whereabouts of the 1983 graduating class are collected on the School Data Form. LEA personnel responsible for completing these forms have been asked to include all 1983 graduates plus any subsequent summer school graduates. They are asked to be sure this count does not include duplicates. These data are collected in the fall on an annual basis.

Part II
Trends: Holding Power and Related Data

The brief trends data on holding power and graduates in this section, even of short duration, provide useful benchmarks for appraising extent and rate of change in secondary education in Kentucky. Though limited to measures of quantity only, the data provide important indices to aid in high school program evaluation and as a base for further curriculum study.

As a general measure of holding power, Tables 5, 6, and 7 provide a concise summary of the ten graduating classes of public, non-public, and combined high schools from 1974 to 1983. The majority of graduates of 1983 were enrolled in the first grade in the school year 1971-72--sixteenth year of the Foundation Program Law of 1956.

Table 5 presents statewide data for public school districts on survival rates and whereabouts of graduates of public high schools for ten graduating classes, 1982-83 inclusive. Corresponding data for non-public high schools are presented in Table 6. Table 7 shows the combined data for all high schools and provides, in terms of enrollment and holding power, a measure of the growth of the total secondary program in Kentucky.
